SHEBOYGAN,

TUESDAY, DECEMBER 30, 1851.

SHEBOYGAN HARBOR.

It is time that the people of this village were doing something in relation to our Harbor. We can not expect or invite business here next season, unless we do something besides talk about Sheboygan river being an excellent place for a commercial port. We regard the present as a crisis in the growth of the town, and if there is no substantial movement made this year in this matter, our beautiful prospects will become remarkably less. People will lose confidence in the enterprise of the Village and will move to other places. The property holders have got to act as well as speculate, or they will have nothing to do hereafter but pay taxes. The arrangements being made by steamboat lines for the next year's business is decidedly in our favor, and now is the time to wake up a feeling on this subject, or trade and travel will pass by us.

The old harbor bill that died a religious death in the U. S. Senate last year is again before that body, and we believe its passage will depend very much upon the interest that is exhibited about the lakes, while it is pending before Congress. Petitions should be circulated, meetings held and resolutions passed, or the timid and time serving demagogues from the north, will again truckle to the bolder and more chivalrous demagogues from the south.

When there is a will, there is a way, and if we unite as one man with a determination to have a harbor, either from public or private funds, Sheboygan River, will this year open its mouth, wide enough to swallow the largest boat that floats upon the Lakes.

LAND, HO!—We learn that arrangements are being made in Chicago and other places east, to run a daily line of first class steamers between Chicago and Buffalo, and that on the completion of the Railroad from Buffalo to Cleveland, there will be two lines of Boats around the Lakes next season. This looks well for Sheboygan! Let no one despair; there is a good time coming.

The owners of the line of Boats connected with the Mich. Central Railroad have made arrangements to make this (Sheboygan) their northern terminus next season, and it is also expected that the Michigan Southern Railroad will also make this the northern terminus of their line of boats, thus giving us two daily lines from this place to Chicago, and thence east next season. Shall we remain inactive, or shall steps be taken at once to secure the business tendered us, which we cannot hope to retain, unless some measures are taken to make this a shelter for boats in bad weather. (Sheb. Mercury.)

GUTTA PERCHA PUMPS.—During the extreme cold weather in this town, these pumps entirely failed. The material became frozen and slipped over the wheel.

STOP THEFT!—We are glad to learn that a move has been made by our citizens to employ a night-watch. In our opinion it will furnish a better protection to property, than an insurance policy. With a well organized police of this description, the villain or villains who broke open Anable & Co's store lately and who probably intend to break into others during the winter, will soon find it "hard times." The establishment of an efficient watch, who will not steal or go to sleep, will also materially reduce the rates of insurance. We hope the effort will succeed.

Sunday night last it commenced snowing here and we now have enough of it to admit of sleigh-riding. While writing this we hear the merry sound of bells, and people all seem to enjoy it.

The Springfield Republican gives the following "nut" for geologists to crack: Hiram D. Witt, of this town, who has recently returned from California, brought with him a piece of the auriferous quartz rock, of about the size of a man's fist. On Thanksgiving day, it was bro't out for exhibition to a friend, when it accidentally dropped; upon the floor, and split open. Near the centre of the mass, was discovered, firmly imbedded in the quartz and slightly corroded, a cut iron nail, of the size of a six-penny nail. It was entirely straight and had a perfect head. By whom was that nail made? At what period was it placed, in the yet uncrystallized quartz? How came it in California? If the head of that nail could talk, we should know something more of American history than we are ever likely to know.

SEWING MACHINES will be used.—The New York National Democrat says: There are now in that city no less than fifty sewing machines driven by steam power, which turn out an enormous number of pants each day, besides fine coats and other articles of apparel. One girl, with the aid of machinery, can turn out as much work as six girls can, with needles used by hand. The pro-

fits of this machine labor are enormous—but it is the capitalist who owns the machine who realises the gain.

GLEASON'S PICTORIAL DRAWING ROOM COMPANION.—This truly elegant weekly graces our table, and fully sustains the exalted position which is every where accorded to it. In the new field of literature, the generous and enterprising publisher is without a rival; and the superior and discriminating judgment which marks all his plans, cannot fail to be most gratifying to his liberal mind, and profitable to his purse. It is worth more than any magazine in the country; its engravings of places of note, its illustrations of home pictures, are both splendid and invaluable. It is an ornament to the library of a student; a gem of art to grace a centre table; an appropriate gift to your lady love; and a gem in a literary way, whose perusal will always be profitable. In regard to neatness and typographical exhibition, it may be styled a model for the world; while its famed contributors are of those whose very names are a guarantee of their ability. It is announced that the next volume, which commences upon the first of January next, will excel even the present—artists of celebrity are engaged, and it will be printed upon white satin surface paper during the entire year, together with other features which will add to its many claims upon popular support. Terms, \$3 a year, invariable in advance. F. Gleason, proprietor, Museum Building, Tremont st., Boston.—[Democrat, Doylestown, Pa.]

CRYSTAL PALACE IN NEW YORK.—A petition has been presented to Common Council of New York signed by many citizens, asking that "Madison Square," in the Eighteenth Ward, be granted to EDWARD RIDDLE and his associates, who propose to erect upon said square a building commensurate with the size of the ground, constructed of iron and glass, for the purpose of an Industrial Exhibition of all nations, and to cause the same to be opened to the public on the 13th of April next. "The building to be at least 600 feet in length, with a width of 200 feet, and the whole surrounded with a semicircular roof or dome made of glass, and of a sufficient height to make it one of the most imposing edifices ever erected in this or any other country, and involving an expenditure of at least \$150,000." The memorial was referred to a Special Committee. (Mil. Sentinel.)

MELANCHOLY effects of Joy.—Last Monday a German lady, about 60 years of age, direct from Germany, arrived at the canal landing on LaSalle street, in this place, on the packet. Her health was feeble, and as she desired to stop here, she was assisted in getting off the boat and conducted to Mr. Fick's hotel. On entering the sitting room she suddenly and unexpectedly found herself face to face with her only daughter whom she had not seen for years, and to see whom she had made her journey to this country. Each recognized each other, and with exultant joy, folded each other in their arms. The mother gave utterance to a few expressions of love and affection for her child, and then swooned away. She was placed upon a bed, and all possible means were used to restore her to consciousness, but all in vain. The spirit had departed—she was dead. (Ottawa (Ill.) Free Trader.)

A NOVEL STEAMER FOR THE HUDSON RIVER.—A correspondent of the Boston Atlas, at Washington says:

"There is a drawing in the Navy Department of a new steambot, which is about to be built in New York for the Hudson river, and which is to make the trip from New York to Albany in 5 hours. She is intended to compete with the New York and Albany Railroad. By the kindness of Commodore Skinner, we obtained her proportions, which are as follows: Length of keel, 500 feet; length of deck 350 feet. She looks like a sword fish. There is 75 feet of keel at each end, extending out from the deck, which shows itself above water, and which is short and pointed like the sword of a sword fish. Both ends of the boat are alike, and her engines are to work both ways. She is not intended to turn round, but to work like a ferry boat. She is to be called the George Washington, and to have accommodations for 3,000 passengers. She will make the passage of 150 miles in five hours. She has been designed and modeled by Mr. Davidson of New York.

The legislature meets on the 14th of January, instead of the second Wednesday, as some suppose.—Madison Democrat.

THE MAYFLOWER.—There is hope of saving this favorite steamer. The Detroit papers of Thursday say that late despatches from Mr. J. W. Brooks, who has gone to look after the wreck, express great confidence that she will be got afloat without material injury.

NEW MAIL CONVEYANCE between New York and Boston.—An experiment is said to have been made, on a small scale, in Boston to test the practicability of conducting letters and newspapers to any distance, by means of atmospheric pressure. A mile of pipe was laid, through which the letters and papers were to pass, and the conclusion is arrived at that communication in this way, between Boston and New-York, can be effected in about four minutes.

THE HUNGARIAN FINANCE COMMITTEE.—The committee appointed in New York consist of some of the first men for integrity of character in that great city. Such names as George Newbold, Moses H. Grinnell, Ambrose Kingsland, Shepherd Knapp, Robert Emmett, &c., are on the Committee. It is therefore certain that whatever money is entrusted to them will be faithfully applied to the Hungarian cause. There can be no question, but what our people are in earnest, and that Kossuth will be able to have at his disposal, \$1,000,000 when he returns in February. "It will be used for the purchase of arms, either here or in Europe—but more probably in our country." [Wisconsin.]

CASH AND LAND WARRANTS.—During the past year there was more Government land paid for in warrants than in cash. If the new bill passes, making Land Warrants assignable, there will be little or no cash receipts.

AFRICA.

Louis Napoleon still in Power.

The Cuba Prisoners all Pardoned!

New York, Jan. 2—2 P. M.
The steamer Africa, from Liverpool, 9 A. M., Dec. 20th arrived at 11 o'clock this morning.

FRANCE.

Accounts from Paris are of an interesting character. The President has distributed an immense number of crosses of honor and decried a large sum of money to be distributed among the disabled soldiers of France.

Gen. Cuvignac had been released from prison unconditionally, and was about to leave France for Holland with his family.

The other generals are to be released on condition of becoming voluntary exiles.

Victor Hugo was at Brussels. The partisans of the President are active in gathering up a large majority, fearing that if not large, he may proclaim himself Emperor. Others were doing all in their power to induce the people not to vote at all.

Appearances, however, indicated that he would have all as many votes in his favor as in 1848.—A majority at Metz garrison voted against the President, and the scholars in the Paris school, who were electors, amongst them the young prince Polignac.

The President held a levee on the 17th; all the corps diplomatique attended except Mr. Rives the American Minister. The President is to take an active part in the drawing up of the new constitution. It occupies less than 8 hours daily. The duke D'Angoulême, eldest son of the duke D'Grammont, has been appointed minister to Hesse Cassel. The department of Police has been raised to the rank of the ministry. Mr. Carlier is the new minister.

The latest accounts from Paris state that Gen. Cuvignac refuses his release unless the same favor be extended to all his fellow prisoners.

SPAIN.

The Madrid Gazette contains an important document from the Minister of Foreign Affairs, in reply to Mr. Webster's note on the Cuban difficulties, and expressive of his satisfaction at its tone, because it is considered an act of justice that satisfies Spain, as much as it excites the government of the U. S. Her Majesty's government has never ceased to expect that it would disapprove of such painful events, and that the liberality of its conduct upon the occasion would offer new guarantees and greater security to the maintenance of friendly relations, which with reciprocal advantages, have constantly existed between the two Governments.

The Gazette concludes the pardon of all prisoners, proceeding from the last expedition against Cuba, who may be citizens of the U. S., whether in Spain now, fulfilling their sentence, or coming from Cuba.

New Orleans, Dec. 23.

THE REVOLUTION IN MEXICO.—By the receipt of Brownville (Texas) papers to the 3d instant we learn that the Revolutionists in Northern Mexico had commenced the struggle against General Government. Gen. Carvajal had attacked the Mexican General, Irigun, who had fortified himself in Cerral. After two days hard fighting Carvajal took nearly the whole town and drove the Mexicans to a fortified house where they were completely penned up—all the powder and other munitions of war were taken by Carvajal, who had but ten killed, including Lt. Graham and Captain Clive. Capt. Wheat was severely wounded. The loss of the Mexicans was very great, including all the Seminole Indians and their leader. The latest accounts state that Gen. Carvajal was about to attack the Mexicans in their last position. If successful he would enter Monterey without opposition.

New Orleans, Dec. 24.

THE BATTLE.—Accounts from the Rio Grande represent that the engagement between Carvajal and Gen. Jauregui was of the most desperate and bloody kind, and that the latter had retreated to Cerral, 30 miles distant, where the Government troops were completely routed.

LAND FOR SALE.

Situated in Sheboygan County.

COUNTY COURT.

In Probate.—Sheboygan County.
On reading and filing the petition of Maria van den Berg, widow of William van den Berg, deceased, praying that Letters of Administration may issue to her, the said petitioner, upon the Estate of said William van den Berg, it is Ordered that said petition be heard before me, at my Office in the Village of Sheboygan, in said County, on the first Monday of February next, and that notice of said hearing be given to all persons interested, by publishing this order for three successive weeks, previous to said time, in the Sheboygan Nieuwblad, a newspaper published in said County.
Dated, Dec. 24, 1851. Wm. R. GORSLINE, County Judge.

C. B. GRUNWELL, Barber and hair-dresser, Shop on Pennsylvania Avenue, Sheboygan.

GODEY'S LADY'S BOOK FOR 1852.

INCREASE OF READING MATTER !!!

THE LADY'S BOOK for the ensuing year, will present many novel features suited to the advancing demands of the public taste. It has been the object of the publishers.

TO TAKE THE LEAD

among the popular Magazines of this country; and the host of imitations who have been constantly following— "tailing after him in vain"—are sufficient to attest his brilliant success. The promptness with which every new idea that he suggests, is adopted by others, is a sufficient reason for his not being very explicit and exact in his premises of what is yet to come. He does not wish to lay out plans for others to follow. It is sufficient, however, to say that all the existing popular features of the Lady's Book will be retained, many new ones, particularly attractive in a Lady's Book and Family Magazine, will be introduced. The useful and the elegant will always be kept in view.

To the Magazines alone we must look for the effusions of the master-minds of Literature. It is useless to publish a list of names— suffice it to say, that we have published articles, and have others to publish, from

ALL THE BEST AMERICAN WRITERS—MALE AND FEMALE!

GODEY'S LADY'S BOOK for January 1852, will contain in addition to the most beautiful and numerous Engravings—three of which are colored—an additional quantity of reading by American authors. There is no question about the fact, and the tens of thousands of notices that we have from the contemporary press will establish it, that it is

THE MOST MAGNIFICENT PERIODICAL IN THE WORLD!

The publisher will give 12 nos. for 1852, the London Art Union would be proud of, and their price is \$10 a year.

It must be observed that the Lady's Book caters to the taste of the American Ladies. It furnishes them with everything that can interest a Lady—and among others is the following—

Goody's Reliable Fashion Plates Monthly!

with full descriptions—besides chat upon the Fashions every month; giving full explanations of everything new in the Fashionable World.

OUR MODEL COTTAGES.

This is a department peculiarly our own, and the beauty and utility of our models has everywhere been acknowledged.
